

Dear Rising Fifth Graders and Parents,

This packet is designed for practice that will reinforce basic skills studied in fourth grade math. It contains significant review problems and math fact pages that must be completed and returned on the first day of school next fall.

Before beginning the booklet, parents should remove the answer key from the back and place it in a safe spot. Check your child's work after each lesson is completed. Correct any mistakes and offer help if your child is unable to rework the problem correctly.

Carefully work through the pages this summer. If you come across a problem that you do not understand or cannot remember how to work, circle it and skip to the next question. Rushing without having the booklet checked will not provide true review to prepare you for fifth grade math. I will be available via email over the summer to answer any questions regarding this packet. Have a wonderful summer!

Sincerely,

Mrs. Hughes
